

## WIRELESS GAMING ENVIRONMENT

### ABSTRACT OF THE DISCLOSURE

5 A disclosed hand-held device provides a game service system having a wire-  
less communication interface, a display screen and a microprocessor which generates  
a number of game service interfaces on the display screen. The hand-held device may  
input ticket voucher information and communicate with a remote transaction server  
such that a ticket voucher may be validated. Additionally, the hand-held device may  
be used to provide a variety of gaming services using different game service interfaces  
10 provided on the device. These hand-held devices may be checked out by a game  
service representative in a secure manner such that the game service representative  
may roam a game playing area and provide various game services to game players in  
the game playing area using the hand-held device. These game services may include  
ticket validation, a prize validation, food services, accommodation services or a  
15 gaming operations services.
